

MAKSYM MEKHOVSKYI

■ Front-end developer · Forward Deployed Engineer

Ukraine · remote · contact@mekhovskiyi.tech · mekhovskiyi.tech

SUMMARY

Front-end developer and forward deployed engineer. Two years under NDA on an AI site builder, agentic workflow solutions and three Capacitor mobile apps. Before that, games, fintech and Telegram mini-apps.

EXPERIENCE

Forward Deployed Engineer & front-end developer

2024 – present

COMPANY UNDER NDA · REMOTE

- **AI site builder.** A site builder with AI at the core. I build the front end and the AI side of it: agentic workflows, LLM API and third-party AI integrations, MCP servers and clients, and a modern development workflow around them.

Vue · JavaScript · LLM APIs · MCP · AI agents

- **Agentic workflow solutions.** As a forward deployed engineer: agentic workflow solutions built with Claude Code, AI agents and prompt engineering, connected to existing tools through REST APIs, webhooks and OAuth, with RAG knowledge bases and n8n automations where they fit.

Claude Code · AI agents · RAG · n8n · REST APIs · Webhooks · OAuth

- **3 mobile apps, 2025 — 2026.** Cross-platform apps written with web technologies and packaged as native apps with Capacitor (Ionic). Product details are under NDA.

Capacitor · JavaScript

Redesigns & front-end fixes

2023 – present

SIDE WORK

Alongside the main projects: several redesigns of existing sites, plus smaller HTML, CSS and JavaScript fixes, from broken layouts and responsive bugs to misbehaving scripts.

PROJECTS, 2022 – 2024

Telegram mini-app game

07/2024 – 08/2024

A Telegram game whose background follows the phone's tilt.

Games · HTML · SCSS · JavaScript · Three.js · Telegram

Digital banking app

05/2024 – 06/2024

One of the best-designed projects I've built, tuned to the pixel.

Fintech · HTML · SCSS · JavaScript · Figma · Pixelay

HTML5 games 2

02/2024 – 04/2024

Seven games, OOP JavaScript, fully responsive.

Games · HTML · SCSS · JavaScript · PHP

Web game

10/2023

A clean data flow and a smooth hand-off to the back end.

Games · HTML · SCSS · JavaScript

Trading platform

08/2023 – 09/2023

Live market data, staking and a screener, rendered without a framework.

Fintech · HTML · SCSS · JavaScript · PHP · Binance API

Transport booking site

07/2023 – 08/2023

A passenger transport site with a Telegram bot for bookings.

Web · HTML · SCSS · JavaScript · Vue · Telegram Bot

Agri data parser

06/2023 – 07/2023

The largest dataset of Ukrainian farm producers, built with Apify.

Data · Python · JavaScript · Apify · NoSQL

HTML5 games

03/2023 – 05/2023

Five browser games with solid logic under the hood.

Games · HTML · SCSS · JavaScript

Forklift

02/2023 – 01/2024

A static site that grew, edit by edit, into a page builder.

Web · HTML · SCSS · JavaScript · PHP · WordPress · Git

Manufacturing company site

05/2022 – 07/2022

My first commercial site: heavy on animation, online for two years.

Web · HTML · LESS · JavaScript · Vue

SKILLS

Front end & mobile

HTML · SCSS / LESS · JavaScript, OOP · Vue · Three.js · Capacitor (Ionic)

AI engineering

LLM APIs · AI agents & agentic workflows · Prompt engineering · RAG / knowledge-based AI systems · MCP servers & clients · Third-party AI integrations

Agentic coding

Claude Code agentic workflows · Oh My Pi · Orca

Automation & integrations

AI workflow automation · n8n · REST APIs · Webhooks · Authentication / OAuth

Back end & data

PHP · Python · NoSQL · SQLite

Workflow

Git · Figma · Telegram bots

LANGUAGES

Ukrainian C2 · Russian C1 · English C1 (EF SET 66/100) · Polish A2
